

COILSTREAM

Coiled Tubing Products and Services

Chemstream offers its clients a broad inventory of chemicals specifically formulated for coil tubing and stick pipe for frac plug drill outs. Our lab analysis and field experience allows us to provide you with the most effective formula at optimal cost per plug drill out. We specialize in providing chemistries that are safe and effective while providing plug debris-free well bore performance.

Chemstream specializes in:

- Viscosity Build Agents
(gels, polysaccharides, polyacrylamides)
- Friction Reducers
- Pipe-on-Pipe Lubricants
- Beads
- Graphite Lubricants
- Corrosion Inhibitors
- Biocides
- Gas Scavengers
- Scale Inhibitors
- Foamers and Antifoams

Chemstream's products remain effective in both flowback water or production brine, as well as fresh water during drill outs. A free analysis of your operations will include water sample collection, a rigorous lab evaluation, a recommended product and delivery mode, along with any necessary field testing and operator training.

Contact us today for a free site evaluation, or more information on how we can meet your specific needs.
