

CoilSTREAM PF 6500 PACKER FLUID

CoilSTREAM PF 6500 is a specialty chemical blend that provides hydrostatic pressure to lower differential pressure across the well sealing element. CoilSTREAM PF 6500 is also designed to protect metals and elastomers from harmful corrosion and corrosion by-products.

Dosage

Packer fluids are designed for the specific parameters of a given completions program. Chemstream consultants will design a chemical loading profile to provide sufficient density to control the producing formation, be resistant to viscosity variations, be free of solids, and reduce corrosion on the wellbore and completions equipment.

Benefits

- Chemically compatible with the reservoir formation and fluids
- Provides a safe, solids-free, environment for well completion
- Resistant to viscosity variations
- Protects system components from corrosion
- Prevents introduction of solids to the near-wellbore area

Compatibility

Because of its ionic character, CoilSTREAM PF 6500 is compatible with the fluid systems and additives used in oilfield applications. This product has been shown to have negligible impact on gel, crosslinked gel, FR, and lube systems.

Handling/Storage

Store in a cool, dry, well ventilated and shaded area, away from heat sources and incompatible materials. To maintain product quality, store product at temperatures below 104°F (40°C). Refer to the Safety Data Sheet (SDS) for handling and hazard data.

Physical Properties

Appearance	Clear yellow liquid
Odor	Characteristic
Specific Gravity	1.21
Product Density	10.1 lb./gal
Flash Point	>140°F
Freezing Point	< 10°F
pH (neat)	8.1
Solubility.....	Complete in water

Ordering Information

Available in 5 gallon buckets or totes
