

STIMSTREAM FR NDT 5000

Chemstream has long been a leader in manufacturing friction reducers. NDT5000 is the latest product to be added to our innovative portfolio of friction reducers. **NDT 5000 is the oil and gas industry's premier anionic HVFR that has been scientifically formulated to minimize friction pressure while maximizing viscosity.** This durable product has been manufactured for long lateral applications, allowing operators to complete the longest wells in their portfolios at the lowest chemical costs. **NDT 5000 has been proven to be the answer to eliminating gel, gel breakers, crosslinker, and PH buffers from your current chemical package.** It's ultra-fast inversion time also allows for the viscosity to build quickly, so operators get immediate results and performance.

WHO WE ARE

Since 1997, Chemstream has been recognized as a leader in the specialty chemical industry. Headquartered in Homer City, PA in the heart of the Appalachian Basin, Chemstream specializes in cationic and anionic friction reducers. Our team has helped oil and gas operators across the country reach new levels of efficiency with our state-of-the-art friction reducers. We utilize our in-house laboratory to ensure the right product is selected for each job to maximize efficiency and reduce overall operating costs. We work closely with our customers to develop customized chemical formulations that meet their unique needs. We believe in delivering high-quality products that not only meet but exceed our customers' expectations.

WHY CHOOSE NDT 5000

SCIENTIFICALLY FORMULATED

NDT 5000 is the oil and gas industry's premier anionic HVFR that has been scientifically formulated to minimize friction pressure while building viscosity equivalent to a 15# linear gel system.

OPTIMIZE CHEMICAL PACKAGE

NDT 5000 is blended with an optimal surfactant package for maximum polymer hydration and viscosity build, removing need for pH buffering agent, gels, gel breakers, and crosslinker.

RESEARCH AND DEVELOPMENT

Our products are backed by advanced labs in Homer City, PA and Altoona, PA equipped with cutting-edge technology for research & development and technical support.

ADVANCED PUMPING EQUIPMENT

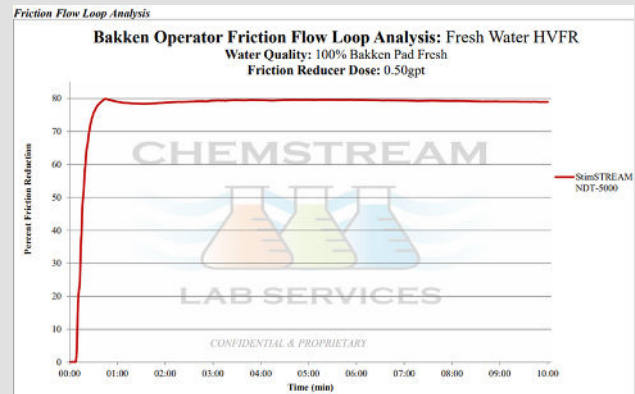

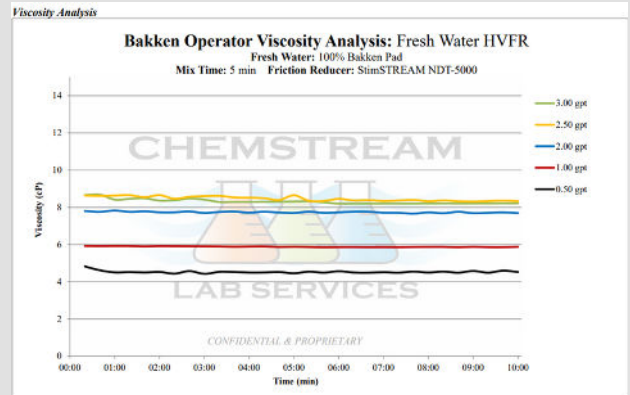

Chemstream also offers the most advanced pumping equipment on the market to maximize the efficiency of your operation. Our vertically integrated business model also ensures that Chemstream trucks, drivers, and tankers will be delivering the products to your site.

BEST-IN-CLASS OPERATIONAL SUPPORT

Our operations team is highly trained and experienced, boasting an impressive 0.00 TRIR for the past 2 years.
