

STIMSTREAM FR 9800

Chemstream has long been a leader in manufacturing friction reducers. FR 9800 is the oil & gas industry's premier cationic FR that has been scientifically formulated to minimize friction pressure in the toughest produced water conditions. This durable product has been manufactured for long lateral applications, allowing operators to complete the longest wells in their portfolios at the lowest chemical costs. FR 9800 has been the proven answer for oil & gas operator's produced water reuse challenges. For years, operators across the country have turned to FR 9800 to avoid produced water disposal costs and significantly improve operational efficiencies when pumping produced water.

WHO WE ARE

Since 1997, Chemstream has been recognized as a leader in the specialty chemical industry. Headquartered in Homer City, PA in the heart of the Appalachian Basin, Chemstream specializes in cationic and anionic friction reducers. Our team has helped oil and gas operators across the country reach new levels of efficiency with our state-of-the-art friction reducers. We utilize our in-house laboratory to ensure the right product is selected for each job to maximize efficiency and reduce overall operating costs. We work closely with our customers to develop customized chemical formulations that meet their unique needs. We believe in delivering high-quality products that not only meet but exceed our customers' expectations.

WHY CHOOSE FR 9800

PRODUCED WATER REUSE

FR 9800 is the oil and gas industry's premier cationic FR that has been scientifically formulated to perform best in the toughest produced water conditions.

SCIENTIFICALLY FORMULATED

FR 9800 is blended with an optimal surfactant package for maximum polymer hydration allowing for operators to achieve minimum friction pressure and pump over 100 bpm, significantly reducing costs and streamlining operations.

RESEARCH AND DEVELOPMENT

Our products are backed by advanced labs in Homer City, PA and Altoona, PA equipped with cutting-edge technology for research & development and technical support.

ADVANCED PUMPING EQUIPMENT

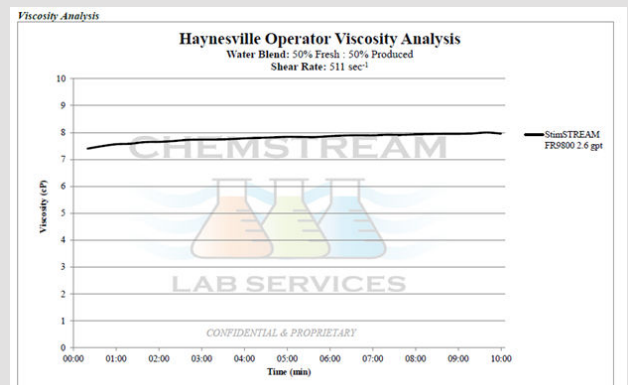

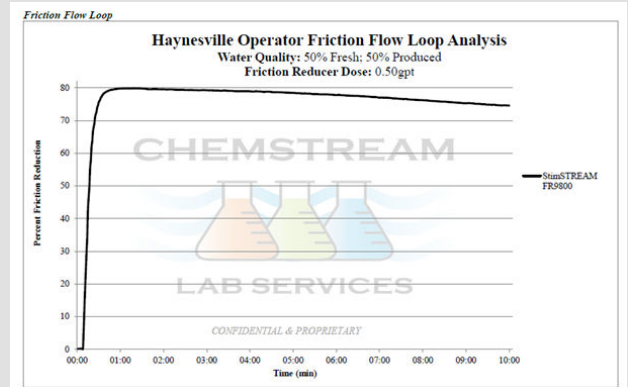

Chemstream also offers the most advanced pumping equipment on the market to maximize the efficiency of your operation. Our vertically integrated business model also ensures that Chemstream trucks, drivers, and tankers will be delivering the products to your site.

BEST-IN-CLASS OPERATIONAL SUPPORT

Our operations team is highly trained and experienced, boasting an impressive 0.00 TRIR for the past 2 years.
